No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Description

Application US/09794236

Patent No. 6337069

GENERAL INFORMATION:

APPLICANT: Grouzmann, Bric

APPLICANT: Lacroix, Jean-Silvain

APPLICANT: Monod, Mitchel

TITLE OF INVENTION: Method of Treating Rhinitis and Sinusitis

FILE REFERENCE 81985/276823

CURRENT APPLICATION NUMBER: US/09/794,236

CURRENT FILING DATE: 2001-02-28

NUMBER OF SEQ ID NOS: 4

SOFTWARE: PatentIn version 3.0

Sequence 6, Application US/10002593

Patent No. 6586198
GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: Vanderbilt University
APPLICANT: Brown, Nancy J.
APPLICANT: Brown, Nancy J.
TITLE OF INVENTION: BIOLOGICAL MARKERS AND DIAGNOSTIC TESTS FOR ANGIOTENSIN CONVERTIR-
TITLE OF INVENTION: BIOLOGICAL MARKERS AND DIAGNOSTIC TESTS FOR ANGIOTENSIN CONVERTIR-
TITLE OF INVENTION: BIOLOGICAL MARKERS AND USOPERFIDASE INHIBITOR ASSOCIATED ANGIOEDEMA
FILE REFERENCE: Atty Docket US/10/002,593
CURRENT FAPLICATION NUMBER: US/10/002,593
FRIOR APPLICATION NUMBER: 60/244,524

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Sequence 2, Application US/08619280A
Patent No. 5767242
GENERAL INFORMATION:
APPLICANT: Zimmermann, Rainer; Park, John E.;
APPLICANT: Zimmermann, Rainer; Park, John E.;
TITLE OF INVENTION: ISOLATED DIMERIC FIBROBLAST ACTIVATION PROTEIN TITLE OF INVENTION: ALPHA, AND USES THEREOF
